

Wood Grain and Painted Finishes

Danver now offers their premium stainless steel cabinetry with a variety of exterior finishes for those who prefer the look of wood, want colors for their designer look or to blend in with the environment or just want the extra protection against the elements.

PROTECT-A-COAT:

- Retain the look of stainless, but seal it from salt, chlorine or muriatic acid.
- Available on all exterior surfaces (doors, drawer fronts or panels) or the complete cabinet.
- With the stainless sealed from the elements, the finish is virtually maintenance free.

PAINTED FINISHES:

- Powder coat colors are used to achieve a designer look or to blend into the environment.
- Available for indoor and outdoor kitchens.
- Choose colors from our paint supplier's web site.
- Protects the stainless substrate from the elements like Protect-A-Coat for a virtually maintenance-free finish.

WOOD FINISHES:

- An Italian painting process transfers wood grain inks into a base powder coat to create tremendously realistic wood finishes on stainless doors.
- Available for indoor and outdoor kitchens.
- Use the wood finish on accent doors and panels, or make the kitchen all with the wood look or blend into the environment.
- Protects the stainless substrate from the elements like Protect-A-Coat for a virtually maintenance-free finish.

Available wood species:

9128 Dark Walnut, 9061 Cherry Flame, 9026 Cherry, 9053 Douglas Fir, 9052 Dark Oak, 9052 Light Oak, 9017 Acacia Light, 9017 Acacia Red, 2601 Teak Dark, 9173 Burlwood Dark. All colors with textured finish.
